

YEMMALA LEKHA SREE

B.Tech-Computer Science and Engineering (AI & ML)

Madanapalle Institute of Technology and Science, Madanapalle | 2023 – 2027

☎ +91 9676512443 | ✉ lekhassree0910@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering (Artificial Intelligence & Machine Learning) student with hands-on experience in AWS Cloud Computing, Python development and Web development. Completed internships in Artificial Intelligence and Cloud Technologies. Skilled in Python, Flask, SQL, AWS, and Machine Learning.

TECHNICAL SKILLS

Programming Languages: Python, C

Web Development: HTML, CSS, JavaScript, Flask, ReactJS, Django

Cloud Computing: AWS EC2, S3, RDS, VPC, Route53, CloudWatch, Auto Scaling, Load Balancing

Databases: MySQL, MongoDB

Relevant Coursework: Database Management Systems, Operating Systems, Machine Learning, Artificial Intelligence

INTERNSHIP EXPERIENCE

AI Intern | Infosys Springboard

Dec 2025 – Feb 2026

- Worked on AI-Powered Sustainable Packaging Recommendation System(EcoPackAI).
- Integrated AI workflows with Flask backend and MongoDB database.
- Implemented machine learning workflows for recommendation and prediction tasks using industry-standard tools.

Cloud Technology Intern | Saraj Innotech Services Pvt. Ltd.

Jun 2025 – Aug 2025

- Worked extensively with AWS cloud services, including EC2, S3, RDS, Route53, VPC, Auto Scaling and CloudWatch.
- Developed and deployed cloud-based web applications using Flask and AWS infrastructure.
- Configured networking, monitoring and scalability solutions using AWS best practices.

PROJECTS

EcoPackAI – AI-Powered Sustainable Packaging Recommendation System

[GitHub](#)

Technologies: Python, Flask, SQL, Random Forest, XGBoost

- Developed an AI-powered recommendation system using Random Forest and XGBoost for sustainable packaging selection.
- Predicted packaging cost efficiency and CO₂ footprint using machine learning models.
- Built Flask REST APIs and integrated a MongoDB database for data management.
- Designed analytics dashboards to support sustainability-focused business decisions.

GradePath – AI-Driven Multi-Tier Grade

[GitHub](#) | [Live Demo](#)

Technologies: Django, Django REST Framework, Python, MongoDB Atlas, Groq API, JavaScript, HTML5, CSS3, Tesseract OCR

- Developed a full-stack AI-powered study planning platform that generates personalized study schedules based on a student's syllabus, target grade, exam date, and daily availability.
- Integrated the Groq API to analyze uploaded syllabi and generate intelligent, three-tier study plans (Baseline, Plus5, Plus10) with automatic fallback logic.
- Implemented OCR-based syllabus extraction supporting PDF, text, and image uploads using Tesseract OCR and pypdf.
- Designed a MongoDB-backed architecture for users, study plans, progress tracking, and history management, with SQLite used for Django administration and sessions.

CERTIFICATIONS

- IBM (Coursera) – Python for Data Science, AI & Development.
- Google (Coursera) – Foundations of Cybersecurity.
- Oracle AI Database Certified Foundations Associate.
- Employability Enhancement Program — HCL GUVI(150 Hours Training)

EXTRA CURRICULAR & CO-CURRICULAR ACTIVITIES

- Completed industry-oriented internships in Python Full Stack, Artificial Intelligence and Cloud Computing.
- Organized the "CODE CRACKERS" technical event during ASHV-2K26 and coordinated the "AUCTION ARENA" event during AIMEX-2K26.
