PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering (Artificial Intelligence & Machine Learning) student with hands-on experience in AWS Cloud Computing, Machine Learning, Python Development, and AI-based systems. Completed internships in AI/ML, Cloud Technologies, and Virtual AI-ML training programs. Skilled in Python, Flask, SQL, AWS, Machine Learning, and Data Structures. Seeking Software Development, AI/ML, and Cloud Computing internship opportunities.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL

Web Development: HTML, CSS, JavaScript, Flask

Cloud Computing: AWS EC2, S3, RDS, VPC, Route53, CloudWatch, Auto Scaling, Load Balancing

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision

Libraries & Frameworks: Pandas, NumPy, Scikit-learn

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Excel

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Deep Learning

INTERNSHIP EXPERIENCE

AI Intern | Infosys Springboard

Dec 2025 – Feb 2026

- Worked on AI-Powered Sustainable Packaging Recommendation System.
- Applied Machine Learning concepts using Random Forest and XGBoost models.
- Integrated AI workflows with Flask backend and PostgreSQL database systems.
- Implemented machine learning workflows for recommendation and prediction tasks using industry-standard tools.

Cloud Technology Intern | Saraj Innotech Services Pvt. Ltd.

Jun 2025 – Aug 2025

- Worked extensively with AWS cloud services including EC2, S3, RDS, Route53, VPC, Auto Scaling and CloudWatch.
- Developed and deployed cloud-based web applications using Flask and AWS infrastructure.
- Configured networking, monitoring and scalability solutions using AWS best practices.

PROJECTS

EcoPackAI – AI-Powered Sustainable Packaging Recommendation System

Technologies: Python, Flask, PostgreSQL, Random Forest, XGBoost

- Developed an AI-powered recommendation system using Random Forest and XGBoost for sustainable packaging selection.
- Predicted packaging cost efficiency and CO₂ footprint using machine learning models.
- Built Flask REST APIs and integrated PostgreSQL for data management.
- Designed analytics dashboards to support sustainability-focused business decisions.

Cloud Resource Management Using AWS

Technologies: AWS, Python, Flask, MySQL

- Designed and deployed a scalable cloud infrastructure using AWS EC2, S3, RDS, VPC, and Route53 services.
- Implemented Auto Scaling, Load Balancers, and monitoring solutions to enhance system availability and performance.
- Built and deployed a Flask web application integrated with AWS RDS for database management and S3 for storage.
- Configured secure networking using VPCs, Security Groups, NAT Gateway, and Route53 DNS services.
- Monitored cloud resources using CloudWatch and SNS to enable proactive system management and alerting.

CERTIFICATIONS

- IBM (Coursera) – Python for Data Science, AI & Development
- Google (Coursera) – Foundations of Cybersecurity
- NPTEL Elite – Design, Technology and Innovation (90%), Understanding Incubation and Entrepreneurship (92%)
- NPTEL – Data Science for Engineers, Introduction to Internet of Things
- Infosys Springboard – Deep Learning for Developers

ACHIEVEMENTS & ACTIVITIES

- Completed three industry-oriented internships in AI/ML and Cloud Computing.
- Organized “CODE CRACKERS” Technical Event during ASHV-2K26 and “AUCTION ARENA” Event during AIMEX-2K26
